

# Europtronic Group Strengthens Management Talent Pool with CMTP

**Singapore, 3<sup>rd</sup> February 2008** - Europtronic Group is taking another proactive step to strengthen its pool of potential management talent by announcing today recruitment plans to attract graduates to participate in its Corporate Management Training Programme (CMTP). This programme is designed to attract recent graduates who are recognised as high achievers, having enthusiasm for the global electronics industry, and with developmental potential to become part of the management team.

"For the third year running, our Corporate Management Training Programme has attracted the best graduates from Singapore, Malaysia and Taiwan," said Donna Huang, Director of Human Resource.

Successful candidates can look forward to participating actively in strategy planning and receiving on-the-job training as part of their immersion programme on Europtronic Group operations in Shanghai and Suzhou, which covers Business Development, Sales and Marketing, Production Planning, Operations, Human Resource, Corporate Finance etc.

Elements of the Corporate Management Training Programme include:

Programme under Component Distribution Business Unit (CDBU) :

- Business Development Programme (BDP) - Frontline functions like Sales, Marketing and Business Development.
- Operations Management Programme (OMP) - Support functions like Human Resource, Corporate Planning and Logistics.

Programme available under Component Manufacturing Business Unit (CMBU):

- Business Development Programme (BDP) – Frontline functions like Sales, Marketing and Business Development.
- Manufacturing Management Programme (MMP) - General factory operations, from Production Planning to Process Engineering.
- Accounting/ Financial Management Programme (AFMP) - Accounting, Financial and Investment-related functions.

Europtronic Group will be participating in several university career fairs in Taiwan and Singapore, starting from February 2008. Interested graduates may visit [www.euoptronic.com](http://www.euoptronic.com) to find out more about the application process and selection requirements.

"If you are raring to take on the challenges offered by working in one of the fastest growing economies in the world – China, send in your application today and let us meet you," added Miss Huang.
